

# Spyda, universal projector mount

Recognised as the UK leader in data projector physical security but appreciating that there are some situations where security is less of an issue, we are introducing our first non-secure universal projector mount. Built to our recognised exacting standards, Dalen Top-Tec can now offer you a one-stop-shop for all your projector mounting solutions, whether or not security is a priority.

The design concept for this product was to develop a competitively priced, easy to install, robust mount that fitted the majority of data projectors. We believe that we have achieved this and can now boast that we have one of the most comprehensive ranges of both secure and non-secure projector mounting solutions in the UK & Europe.

## Adjustable

The Spyda comes with four strong mounting arms, which provide fully adjustable length and fixing positions. The mounting holes on any given projector vary enormously but the Spyda will cope with most sizes, heights and positions of fixing hole. No changing of arms or fittings is required.

Once fixed to the projector and mounted to a ceiling pole, the Spyda can be rotated through 360° and has a maximum tilt of 35°. This provides you with the flexibility to accommodate most types of installation.

## Convenient

To make ordering even easier we have introduced a wide range of bundled products. The Spyda can be ordered as part of a mounting kit bundle, which also includes a ceiling plate and a choice of mounting pole (from 0.5m to 2m).

## Key Features

- Universal one-size-fits-all
- Adjustable arms
- 360° adjustment
- 35° tilt
- Easy to fit
- Robust design
- Can be re-used should projector model change

Model	Examples of hole centre options	
	Maximum mm	Minimum mm
T-T Spyda	288 x 75	95 x 95
	250 x 200	
	225 x 225	

## Mount Kit Bundles
